

Decontamination Certificate

Prevention of human contamination on device during production.

**Technologie Institut Medizin GmbH (TIM),
August - Thyssen - Str. 30, 56070 Koblenz, Germany**

herewith declares on its own responsibility as manufacturer that under observance of the hygienic measures described in QMH 102 VA 01, chapter 5.3.2. human contamination on the device during production is observed and thus contamination of the TIM products is avoided.

Hygienic measures during the production of a TIM product:

- All employees are required to use gowns, gloves and disinfectants in production
- All equipment must be cleaned before final packing
- The cleaning is carried out according to the product-specific working instructions

TIM does everything to avoid contamination of TIM products.

This manufacturer certificate is valid for all TIM products.
